

TESIS

Uma empresa do Grupo Intertek

Quality and Safety

Over 35 years building trust and quality in the Brazilian market.

Why does conformity matter?

Did you know that the quality of the products that reach you has a direct impact on the safety of your family, the efficiency of your business and your ability to compete in the market?

At TESIS, we dedicate our decades of expertise to ensuring that you have access to the highest-quality and safest products.

Imagine purchasing a product for your home or business, trusting in its quality. But what if it doesn't meet technical standards?

Products that do not meet technical standards will have their useful life reduced, will have performance that will probably not meet the needs of consumers and will compromise the competitive isonomy among companies.

TESIS exists to change that. Since 1989, we have been your partner pursuit of advancing quality and promoting fair competition.

We are leaders in supporting industrial sectors that aim to increase their competitiveness, ensure that the products that reach the market will perform properly and that competition between companies will be fair.

Our state-of-the-art infrastructure has 2,500m² of floor space, optimized to deliver the highest standards in product evaluation and testing.

We are a Conformity Assessment Body (OAC), accredited by CGCRE/INMETRO in 17 Sectoral Quality Programmes of the PBQP-H.

Our laboratory conducts more than 400 tests accredited by CGCRE/INMETRO, ensuring the precision and reliability of every analysis.

We manage 70,000 stored samples for traceability and research, demonstrating our strong capabilities in logistics and quality control.

OUR COMPREHENSIVE SOLUTIONS FOR QUALITY

TESIS offers a complete portfolio of services to support compliance and excellence:

1. Sectoral Quality Programmes (PSQs)

As a Technical Management Entity accredited by INMETRO, we develop and manage programs that:

- Ensure products meet consumer needs.
- Promote competitive fairness between suppliers.
- Include quarterly audits and laboratory tests.
- Publish lists of compliant and non-compliant

companies to support transparency

- Assist consumer protection agencies in identifying non-compliance.

EFFECTIVENESS OF SECTORAL QUALITY PROGRAMMES

2. Technical Evaluation of Construction Products.

- We are a Technical Assessment Institution (ITA) accredited by the Brazilian government.
- We evaluate the performance of building systems, both traditional and innovative. This includes everything from established products to emerging technologies that do not yet have Brazilian technical standards.
- Our assessments cover a full range of performance criteria, including mechanical resistance, acoustic performance, fire behavior, durability, and water tightness, among others.

Quality Sector Programme	Compliance Indicators	
	Start of the PSQ	May/25
Water-Saving Appliances	78%	91%
Adhesive Mortars	64%	92%
PVC pipes and fittings for building systems	60%	95%

3. Accredited Testing Laboratory

Our laboratory is fully accredited by INMETRO, providing the reliable and validated results across hundreds of different tests. See the complete list [here](#).

4. Strategic Support for Companies

We help companies optimize the quality of the materials used in their projects through:

- Diagnosis of current practices.
- Identification of national and international best practices.
- Solutions to increase the service life and improve the cost-benefit ratio of installed systems
- Development of monitoring systems for rapid detection of problems

WHY CHOOSE TESIS

Credibility and Security:

Ensure your products and projects meet the highest quality and safety standards to protect

your brand and your customers.

Competitive Advantage:

Out in the marketplace with certified products and demonstrate your commitment to quality

Reduced Risk and Cost Reduction:

Avoid losses due to non-compliant products, rework, legal challenges, and safety incidents.

Validated Innovation:

Rely on expert technical support to bring innovations to market with the confidence of a specialized assessment.

We are different from other Technical Management Entities

Leadership and Effectiveness:

- Market share: TESIS is responsible for managing 74% of the PSQs recognized by PBQP-H;
- Reference: TESIS is not Only the market leader, but also the one that brings the best results, for its clients, drastically reducing non-conformity in various industrial sectors

Recognition by agents:

- TESIS has a strong institutional presence, resulting in recognition from governmental agents, Public Prosecutors, banks financing ventures, etc.

Diversity of Clients

- Our clients come from various productive chains, such as: plastics, chemicals; metallurgy, wood, ceramics, etc.

Proactivity

- We work alongside mobilizing agentes and productive chains to generate demand for our services.

Qualified technical team

- Our team can identify the real needs of our clients and propose effective solutions. We actively participate in standardization, conformity assessment, and support public and private agents in combating non-conformity.

National presence:

- We are present in 24 Brazilian states.

Integrated Services:

- In Various Sectoral Quality Programs, we act not only as a Technical Management Entity, but also as a laboratory and as a Technical Assessment Institution in the preparation of Performance Assessment Sheets
